
Introduction

Lesson Objectives

After completing this lesson, you should be able to do the following:

- Define the goals of the course
- List the features of Oracle Database 11*g*
- Discuss the theoretical and physical aspects of a relational database
- Describe Oracle server's implementation of RDBMS and object relational database management system (ORDBMS)
- Identify the development environments that can be used for this course
- Describe the database and schema used in this course

Lesson Agenda

- Course objectives, agenda, and appendixes used in the course
- Overview of Oracle Database 11*g* and related products
- Overview of relational database management concepts and terminologies
- Introduction to SQL and its development environments
- The `HR` schema and the tables used in this course
- Oracle Database 11*g* documentation and additional resources

Course Objectives

After completing this course, you should be able to:

- Identify the major components of Oracle Database 11*g*
- Retrieve row and column data from tables with the `SELECT` statement
- Create reports of sorted and restricted data
- Employ SQL functions to generate and retrieve customized data
- Run complex queries to retrieve data from multiple tables
- Run data manipulation language (DML) statements to update data in Oracle Database 11*g*
- Run data definition language (DDL) statements to create and manage schema objects

Course Agenda

- Day 1:
  - Introduction
  - Retrieving Data Using the SQL `SELECT` Statement
  - Restricting and Sorting Data
  - Using Single-Row Functions to Customize Output
  - Using Conversion Functions and Conditional Expressions
- Day 2:
  - Reporting Aggregated Data Using the Group Functions
  - Displaying Data from Multiple Tables Using Joins
  - Using Subqueries to Solve Queries
  - Using the Set Operators

Course Agenda

- Day 3:
  - Manipulating Data
  - Using DDL Statements to Create and Manage Tables
  - Creating Other Schema Objects

Appendixes Used in the Course

- Appendix A: Practices and Solutions
- Appendix B: Table Descriptions
- Appendix C: Using SQL Developer
- Appendix D: Using SQL*Plus
- Appendix E: Using JDeveloper
- Appendix F: Oracle Join Syntax
- Appendix AP: Additional Practices and Solutions

Lesson Agenda

- Course objectives, course agenda, and appendixes used in this course
- Overview of Oracle Database 11*g* and related products
- Overview of relational database management concepts and terminologies
- Introduction to SQL and its development environments
- The `HR` schema and the tables used in this course
- Oracle Database 11*g* documentation and additional resources

Oracle Database 11*g*: Focus Areas

Infrastructure Grids

Information Management

Application Development

Oracle Database 11*g*

Manageability

High availability

Performance

Security

Information integration

Oracle Fusion Middleware

Portfolio of leading, standards-based, and customer-proven software products that spans a range of tools and services from Java EE and developer tools, through integration services, business intelligence, collaboration, and content management

Development Tools

SOA Tools & Framework

User Interaction

Portals, Content, Search, Desktop, Mobile, VoIP

Business Intelligence

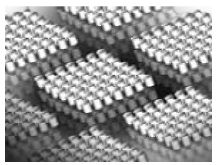
ETL, Q&A, OLAP, Reports, Alerts, Real Time

Integration & Process Management

Messaging, ESB, BPM, B2B, BAM, MDM

Application Server

Java EE, WS-*, Events, Rules



Grid Infrastructure

Clusters, Metadata, Registry, Security

Systems Management

System Application Service

Identity Management

Directory Provisioning, Single Sign-On, Identity Administration

Oracle Enterprise Manager Grid Control

- Efficient Oracle Fusion Middleware management
- Simplifying application and infrastructure life-cycle management
- Improved database administration and application management capabilities

Oracle BI Publisher

- Provides a central architecture for authoring, managing, and delivering information in secure and multiple formats
- Reduces complexity and time to develop, test, and deploy all kinds of reports
  - Financial Reports, Invoices, Sales or Purchase orders, XML, and EDI/EFT(eText documents)
- Enables flexible customizations
  - For example, a Microsoft Word document report can be generated in multiple formats, such as PDF, HTML, Excel, RTF, and so on.

Lesson Agenda

- Course objectives, course agenda, and appendixes used in this course
- Overview of Oracle Database 11*g* and related products
- Overview of relational database management concepts and terminologies
- Introduction to SQL and its development environments
- The `HR` schema and the tables used in this course
- Oracle Database 11*g* documentation and additional resources

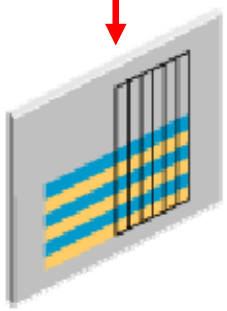
Relational and Object Relational Database Management Systems

- Relational model and object relational model
- User-defined data types and objects
- Fully compatible with relational database
- Supports multimedia and large objects
- High-quality database server features

Data Storage on Different Media

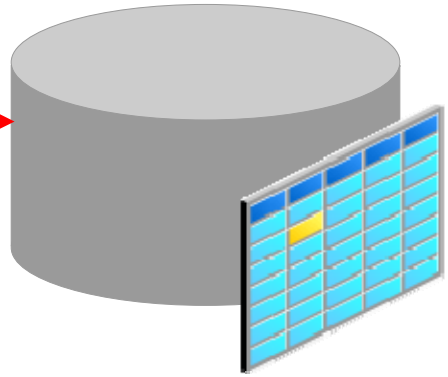
	DEPARTMENT_ID	DEPARTMENT_NAME	MANAGER_ID	LOCATION_ID
1	10	Administration	200	1700
2	20	Marketing	201	1800
3	50	Shipping		
4	60	IT		
5	80	Sales		
6	90	Executive		
7	110	Accounting		
8	190	Contracting		

	GRADE_LEVEL	LOWEST_SAL	HIGHEST_SAL
1	A	1000	2999
2	B	3000	5999
3	C	6000	9999
4	D	10000	14999
5	E	15000	24999
6	F	25000	40000



Electronic spreadsheet

Filing cabinet



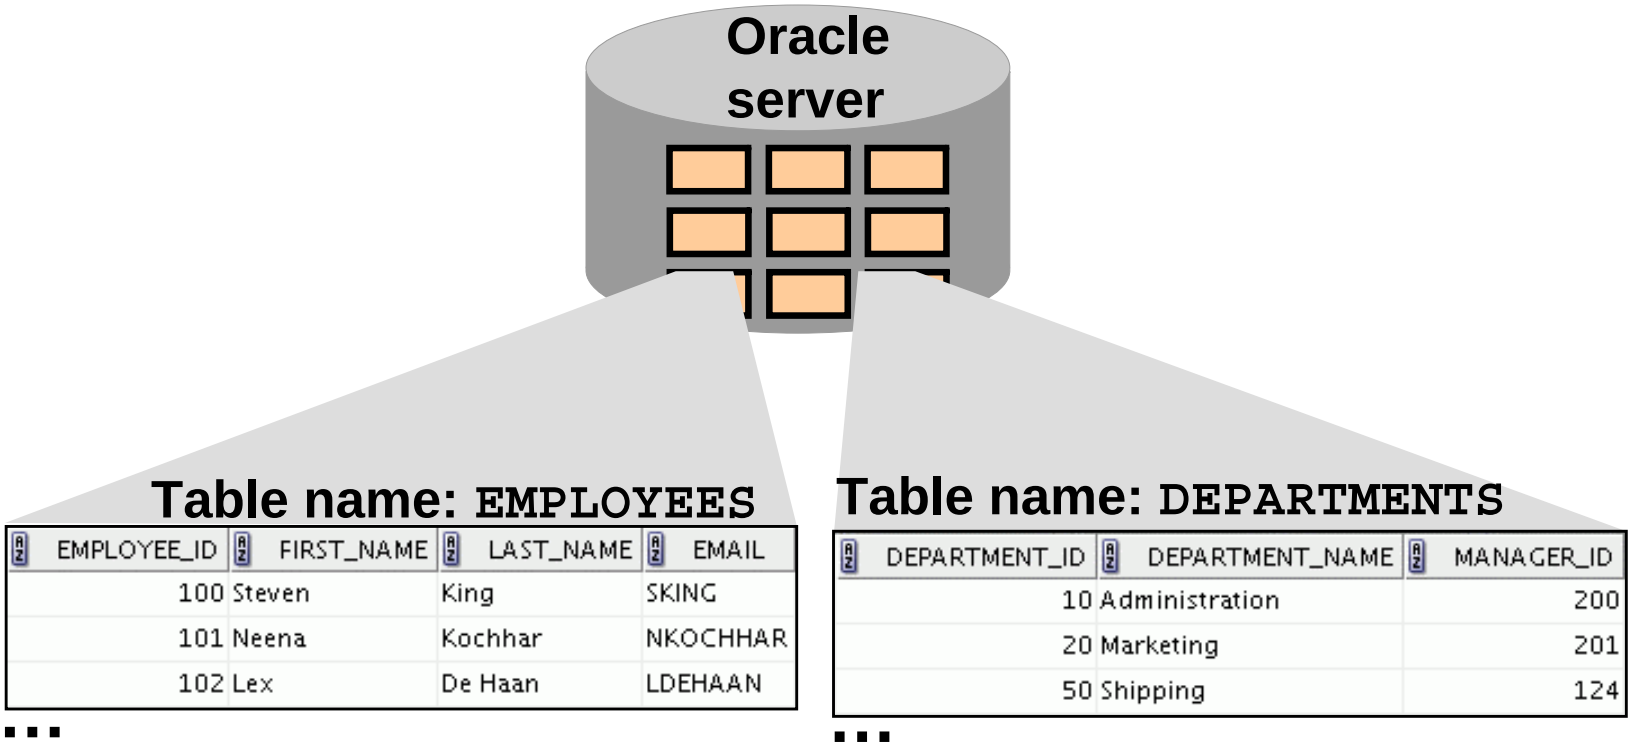
Database

Relational Database Concept

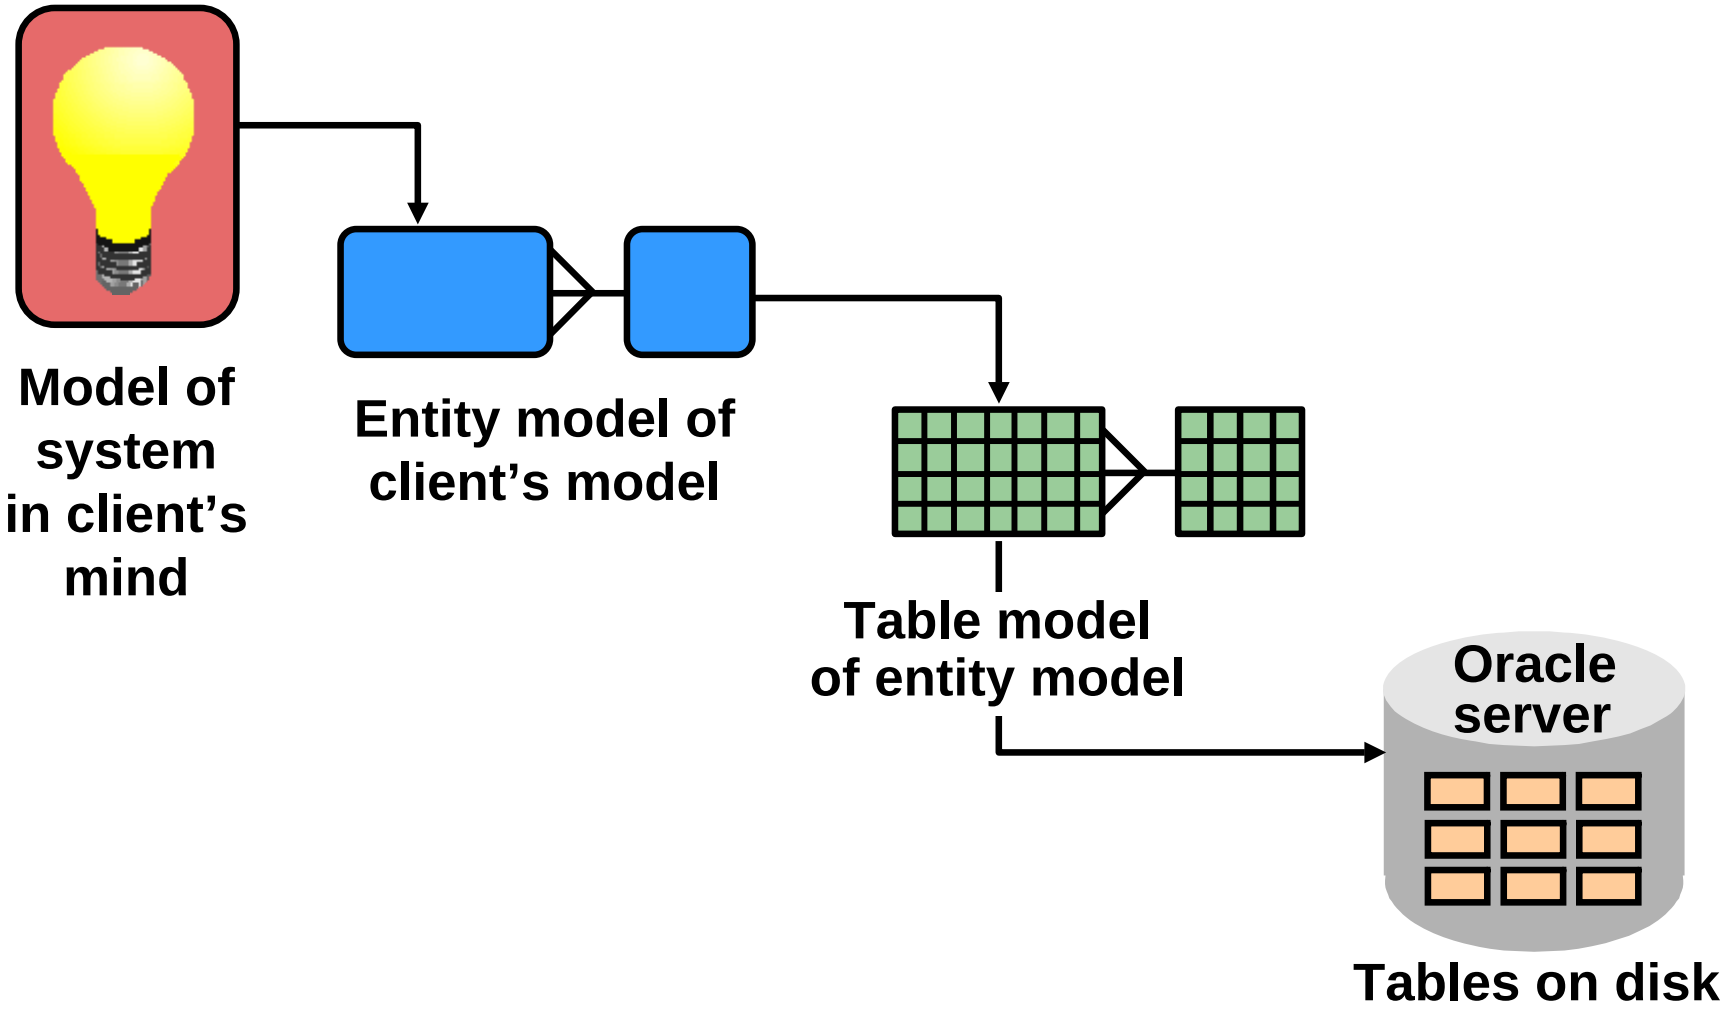
- Dr. E. F. Codd proposed the relational model for database systems in 1970.
- It is the basis for the relational database management system (RDBMS).
- The relational model consists of the following:
  - Collection of objects or relations
  - Set of operators to act on the relations
  - Data integrity for accuracy and consistency

Definition of a Relational Database

A relational database is a collection of relations or two-dimensional tables.

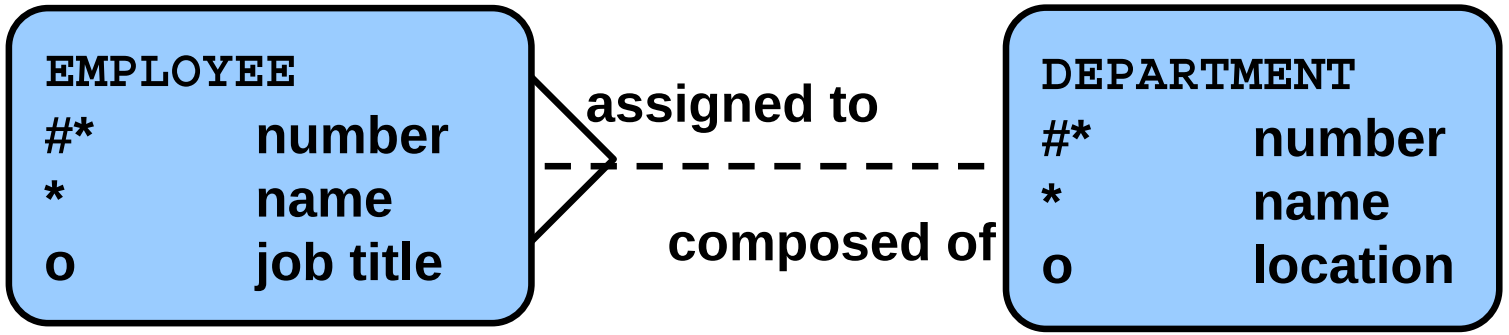


Data Models



Entity Relationship Model

- Create an entity relationship diagram from business specifications or narratives:



- Scenario:
  - ". . . Assign one or more employees to a department . . ."
  - ". . . Some departments do not yet have assigned employees . . ."

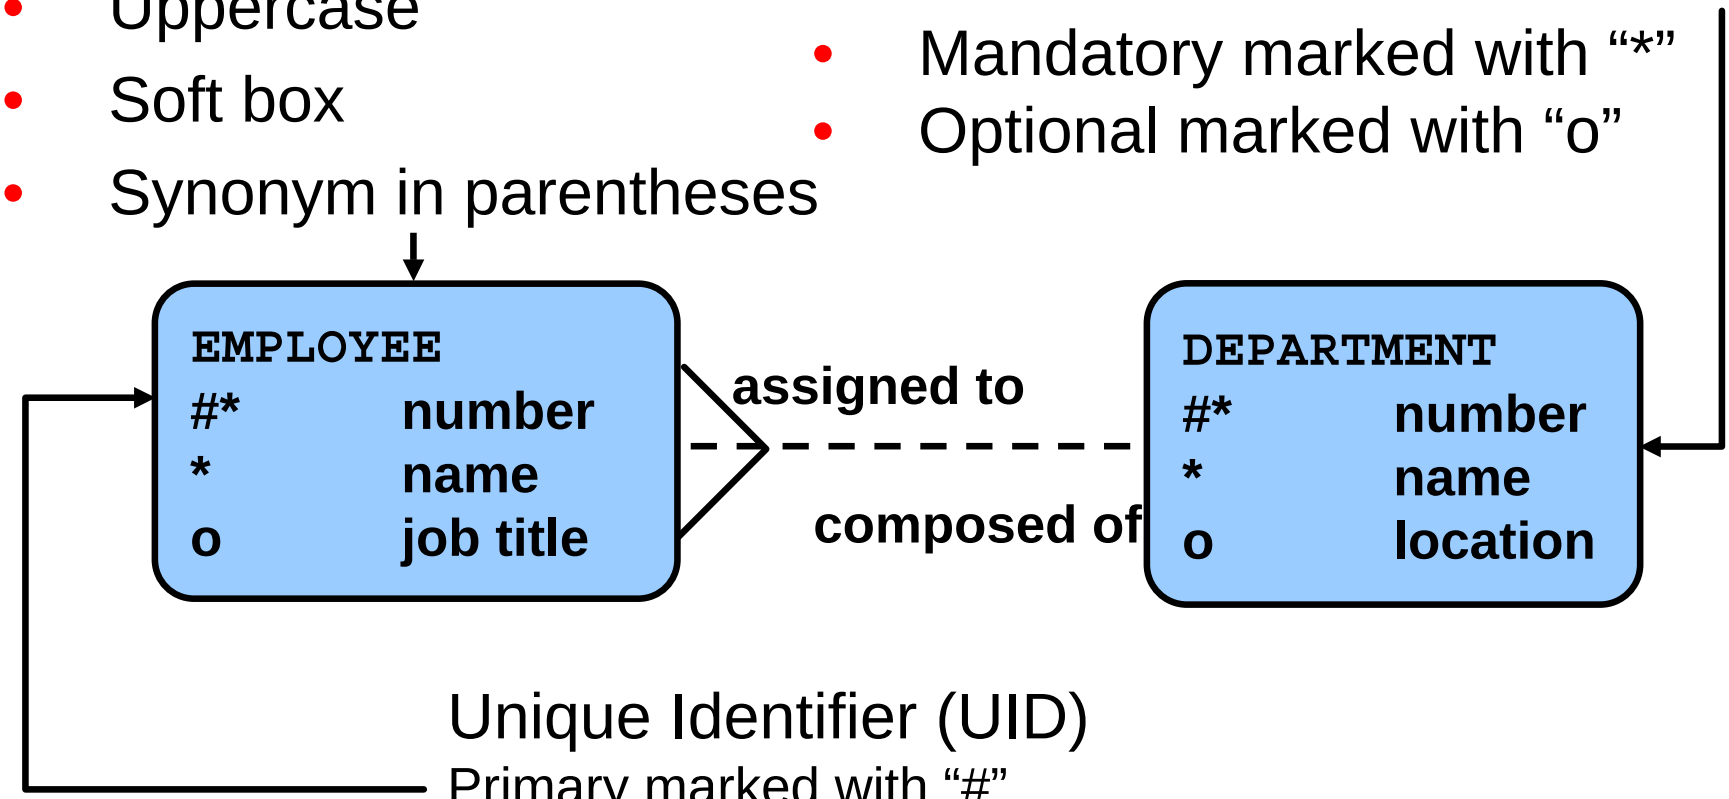
Entity Relationship Modeling Conventions

Entity:

- Singular, unique name
- Uppercase
- Soft box
- Synonym in parentheses

Attribute:

- Singular name
- Lowercase
- Mandatory marked with “*”
- Optional marked with “o”



Relating Multiple Tables

- Each row of data in a table is uniquely identified by a primary key.
- You can logically relate data from multiple tables using foreign keys.

Table name: `DEPARTMENTS`

DEPARTMENT_ID	DEPARTMENT_NAME	MANAGER_ID	LOCATION_ID
10	Administration	200	1700
20	Marketing	201	1800
50	Shipping	124	1500
60	IT	103	1400
80	Sales	149	2500
90	Executive	100	1700
110	Accounting	205	1700
190	Contracting	(null)	1700

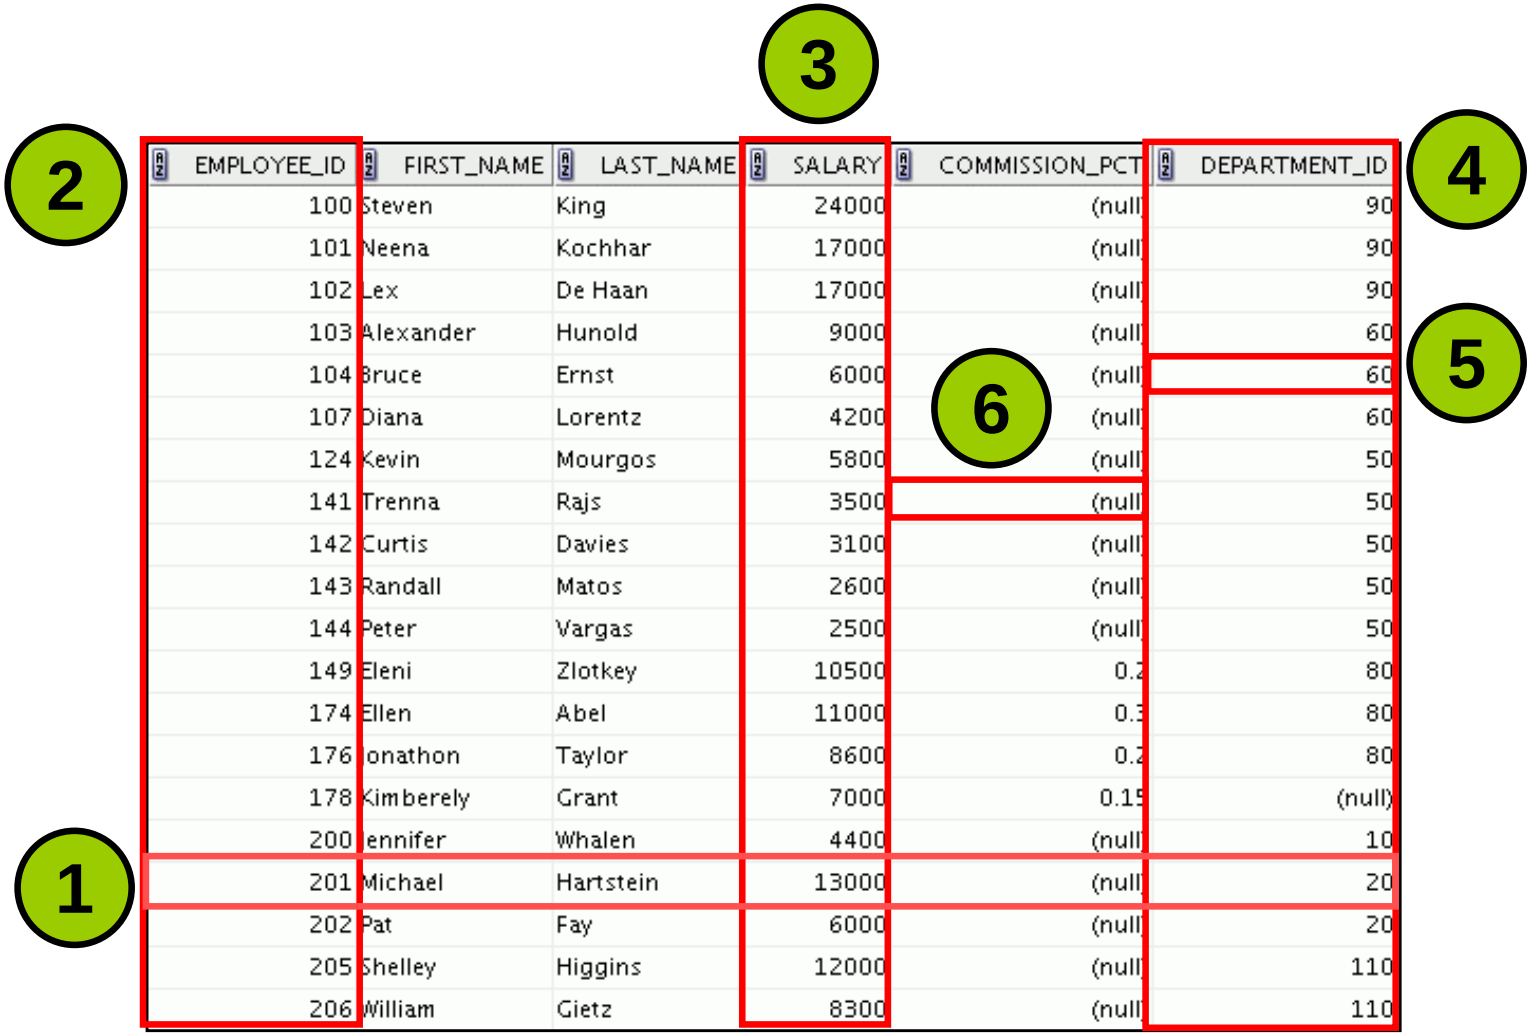
Primary key

Table name: `EMPLOYEES`

EMPLOYEE_ID	FIRST_NAME	LAST_NAME	DEPARTMENT_ID
100	Steven	King	90
101	Neena	Kochhar	90
102	Lex	De Haan	90
103	Alexander	Hunold	60
104	Bruce	Ernst	60
107	Diana	Lorentz	60
124	Kevin	Mourgos	50
141	Trenna	Rajs	50
142	Curtis	Davies	50

Primary key **Foreign key**

Relational Database Terminology



EMPLOYEE_ID	FIRST_NAME	LAST_NAME	SALARY	COMMISSION_PCT	DEPARTMENT_ID
100	Steven	King	24000	(null)	90

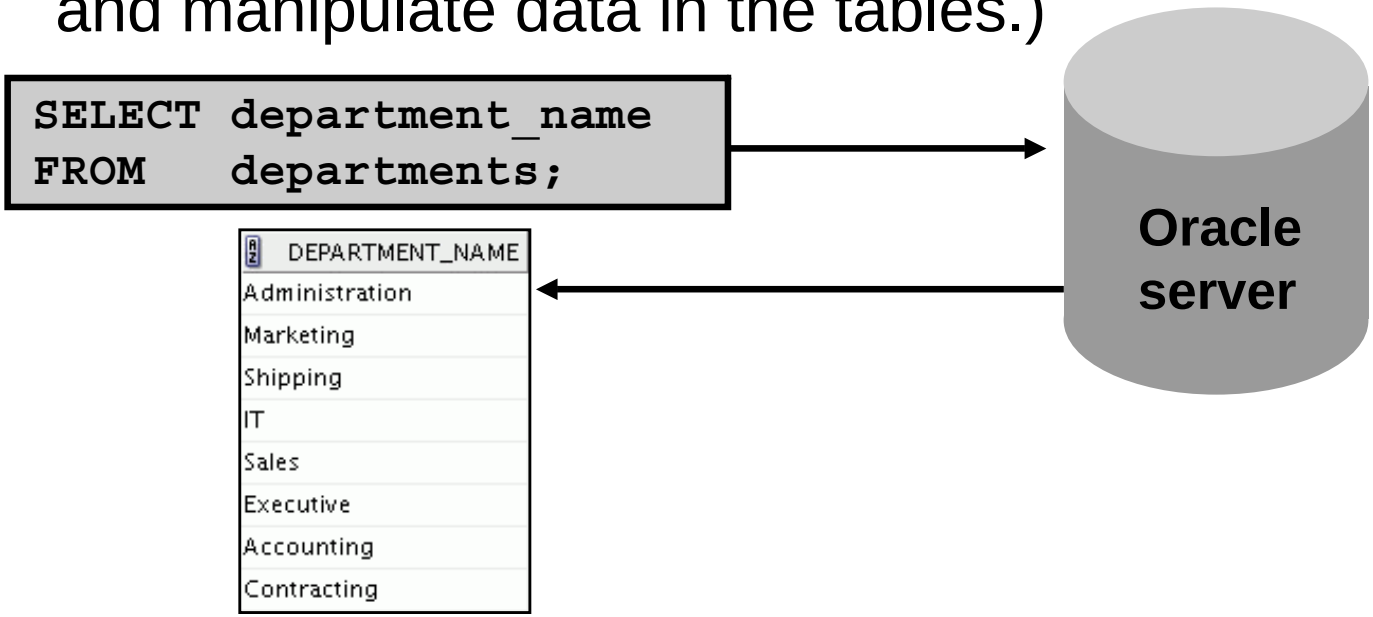
Lesson Agenda

- Course objectives, course agenda, and appendixes used in this course
- Overview of Oracle Database 11*g* and related products
- Overview of relational database management concepts and terminologies
- Introduction to SQL and its development environments
- The `HR` schema and the tables used in this course
- Oracle Database 11*g* documentation and additional resources

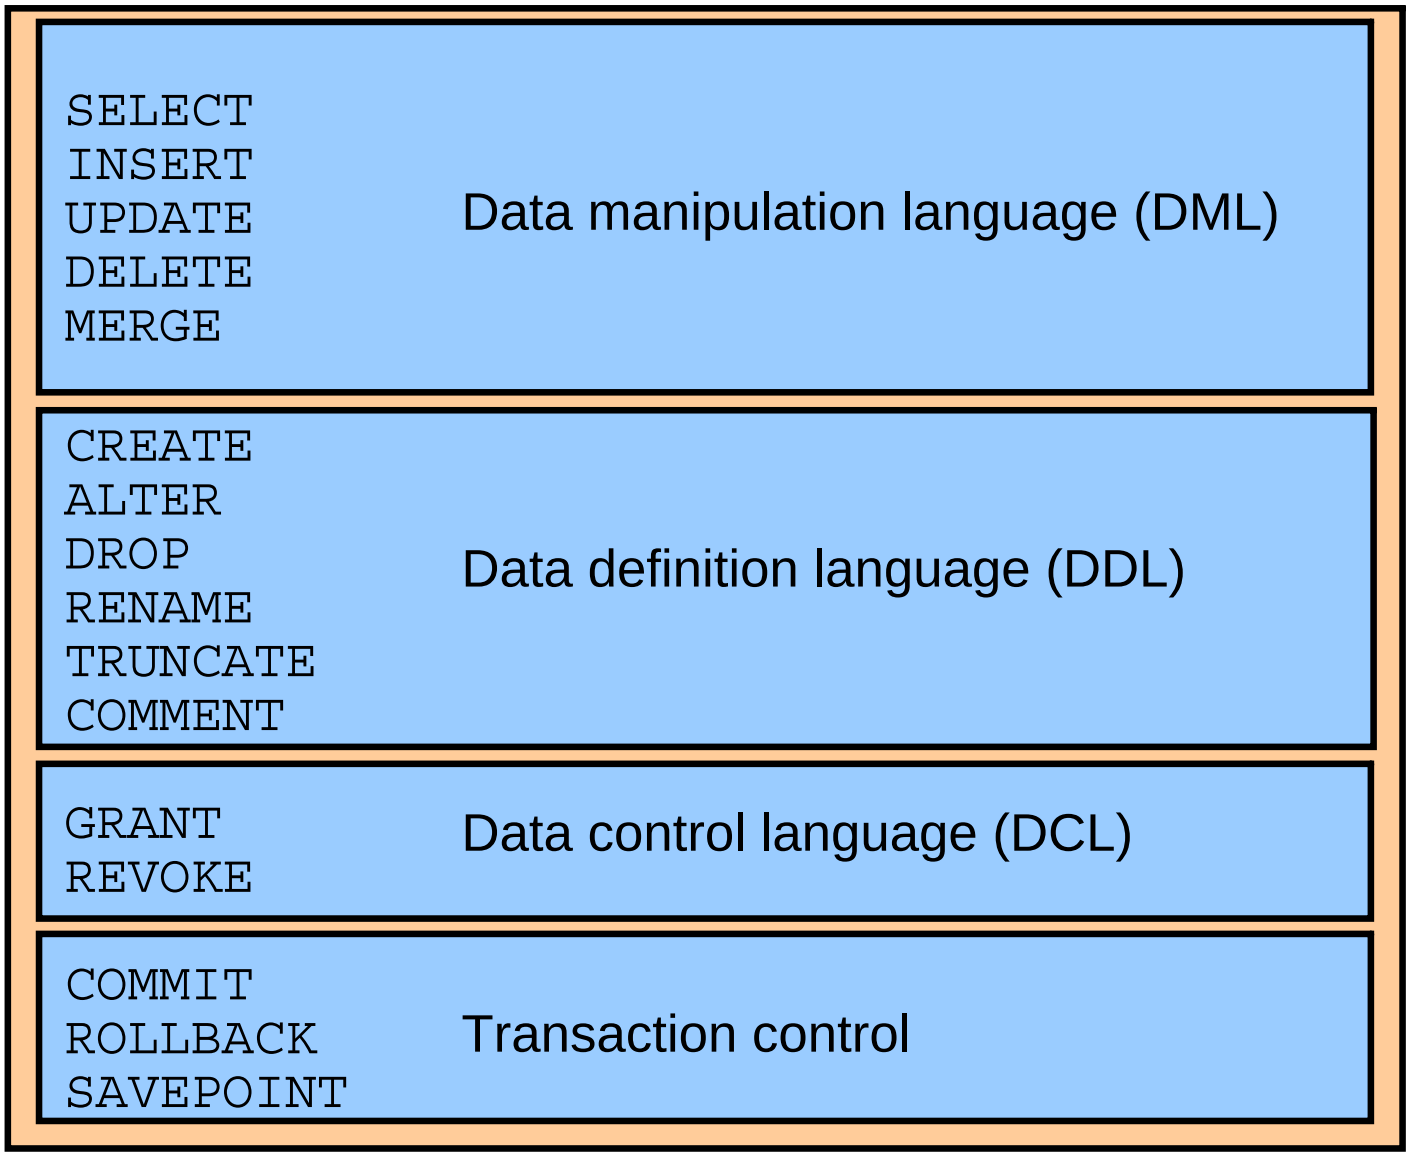
Using SQL to Query Your Database

Structured query language (SQL) is:

- The ANSI standard language for operating relational databases
- Efficient, easy to learn, and use
- Functionally complete (With SQL, you can define, retrieve, and manipulate data in the tables.)



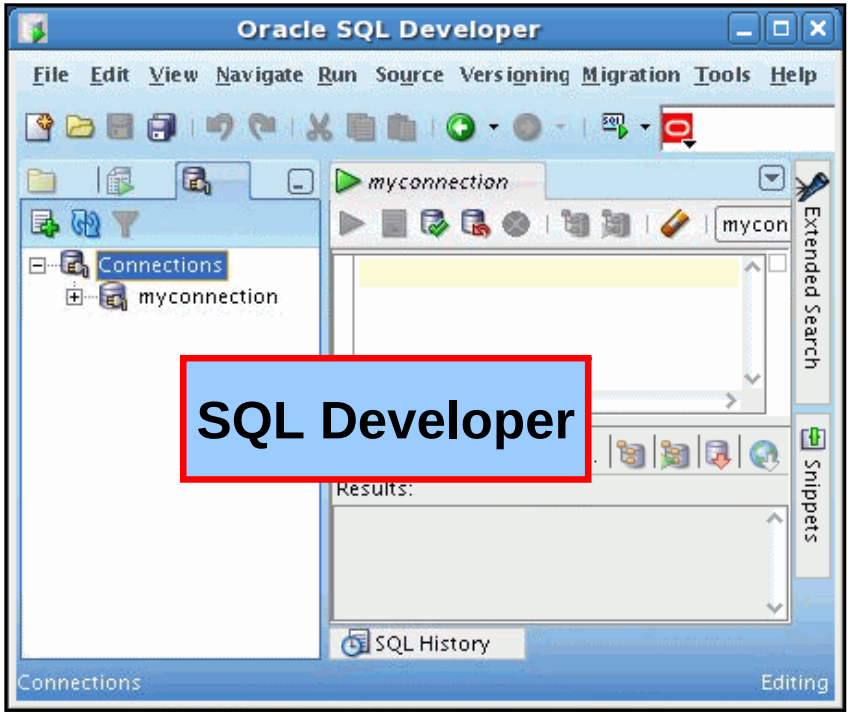
SQL Statements

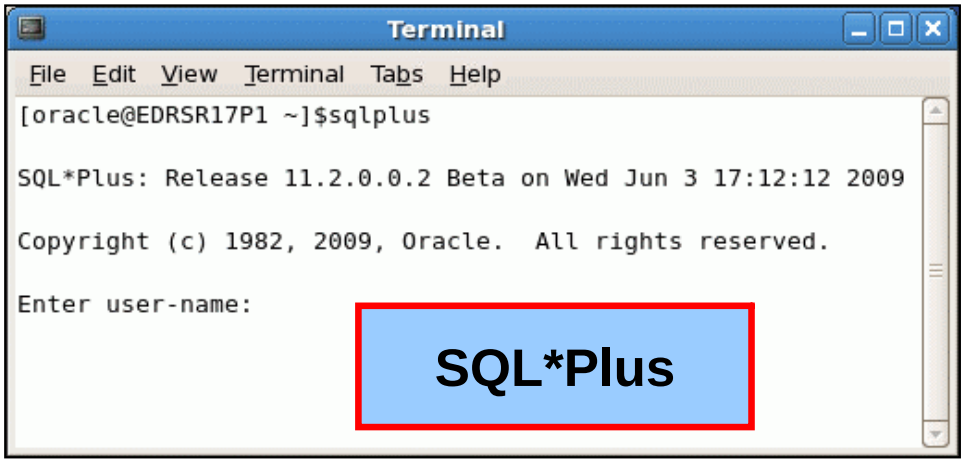


Development Environments for SQL

There are two development environments for this course:

- The primary tool is Oracle SQL Developer.
- SQL*Plus command-line interface can also be used.

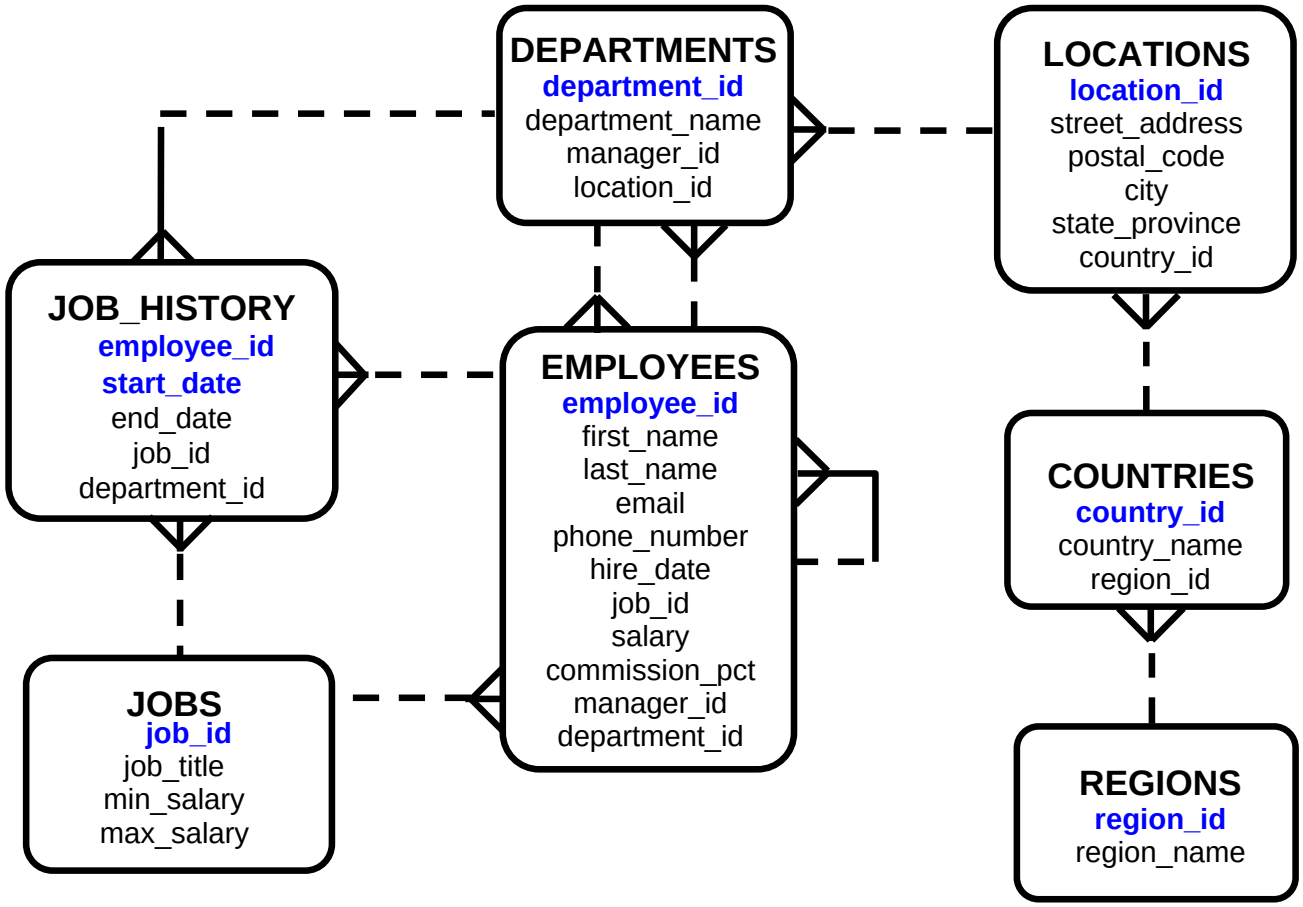




Lesson Agenda

- Course objectives, course agenda, and appendixes used in this course
- Overview of Oracle Database 11*g* and related products
- Overview of relational database management concepts and terminologies
- Introduction to SQL and its development environments
- The `HR` schema and the tables used in this course
- Oracle Database 11*g* documentation and additional resources

Human Resources (HR) Schema



Tables Used in the Course

DEPARTMENTS

Lesson Agenda

- Course objectives, course agenda, and appendixes used in this course
- Overview of Oracle Database 11*g* and related products
- Overview of relational database management concepts and terminologies
- Introduction to SQL and its development environments
- The `HR` schema and the tables used in this course
- Oracle Database 11*g* documentation and additional resources

Oracle Database 11*g* Documentation

- *Oracle Database New Features Guide 11g, Release 1 (11.2)*
- *Oracle Database Reference 11g, Release 1 (11.2)*
- *Oracle Database SQL Language Reference 11g, Release 1 (11.2)*
- *Oracle Database Concepts 11g, Release 1 (11.2)*
- *Oracle Database SQL Developer User's Guide, Release 1.5*

Additional Resources

For additional information about the Oracle Database 11*g*, refer to the following:

- *Oracle Database 11g: New Features eStudies*
- *Oracle by Example series (OBE): Oracle Database 11g*
  - http://www.oracle.com/technology/obe/11gr1_db/index.htm

Summary

In this lesson, you should have learned that:

- Oracle Database 11*g* extends:
  - The benefits of infrastructure grids
  - The existing information management capabilities
  - The capabilities to use the major application development environments such as PL/SQL, Java/JDBC, .NET, XML, and so on
- The database is based on ORDBMS
- Relational databases are composed of relations, managed by relational operations, and governed by data integrity constraints
- With the Oracle server, you can store and manage information by using SQL

Practice I: Overview

This practice covers the following topics:

- Starting Oracle SQL Developer
- Creating a new database connection
- Browsing the `HR` tables
