

Using JDeveloper

Objectives

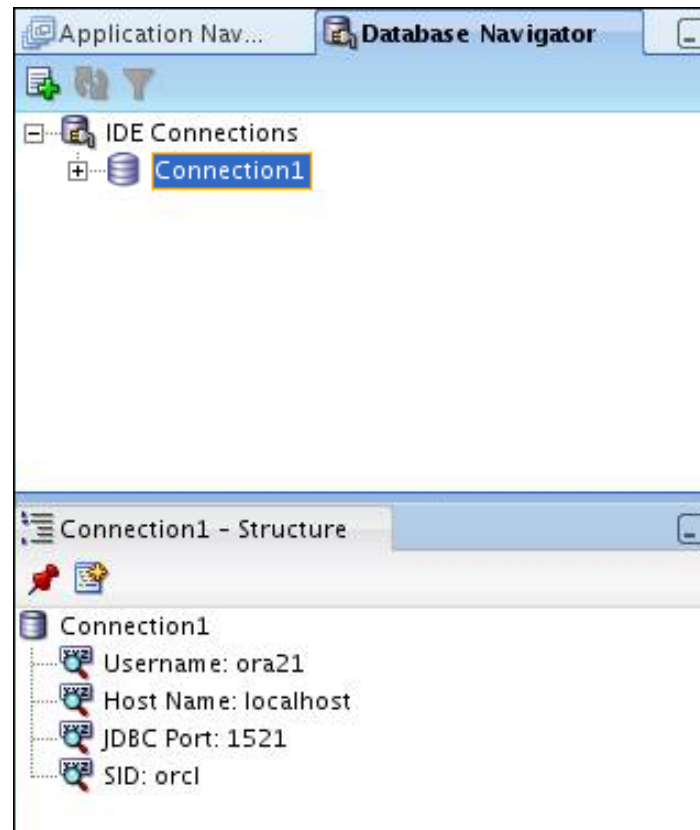

After completing this appendix, you should be able to do the following:

- List the key features of Oracle JDeveloper
- Create a database connection in JDeveloper
- Manage database objects in JDeveloper
- Use JDeveloper to execute SQL Commands
- Create and run PL/SQL Program Units

Oracle JDeveloper

Database Navigator

Creating a Connection

1

Click the New Connection icon in the Database Navigator.

2

In the Create Database Connection window, enter the username, password and the SID.

3

Test the connection.

A screenshot of the 'Create Database Connection' dialog box. The 'Create Connection In:' dropdown is set to 'IDE Connections'. The 'Connection Name' is 'Connection1' and the 'Connection Type' is 'Oracle (JDBC)'. The 'Username' field contains 'ora21', the 'Password' field contains masked characters, and the 'Role' dropdown is empty. The 'Save Password' checkbox is checked. Under the 'Oracle (JDBC) Settings' section, the 'Enter Custom JDBC URL' checkbox is unchecked. The 'Driver' dropdown is set to 'thin', the 'Host Name' is 'localhost', and the 'JDBC Port' is '1521'. The 'SID' radio button is selected with the value 'orcl', and the 'Service Name' radio button is unselected with the value 'XE'. The 'Test Connection' button is highlighted with a red box. Below it, a text area shows 'Success!'. At the bottom, the 'OK' button is highlighted with a red box, along with 'Help' and 'Cancel' buttons.

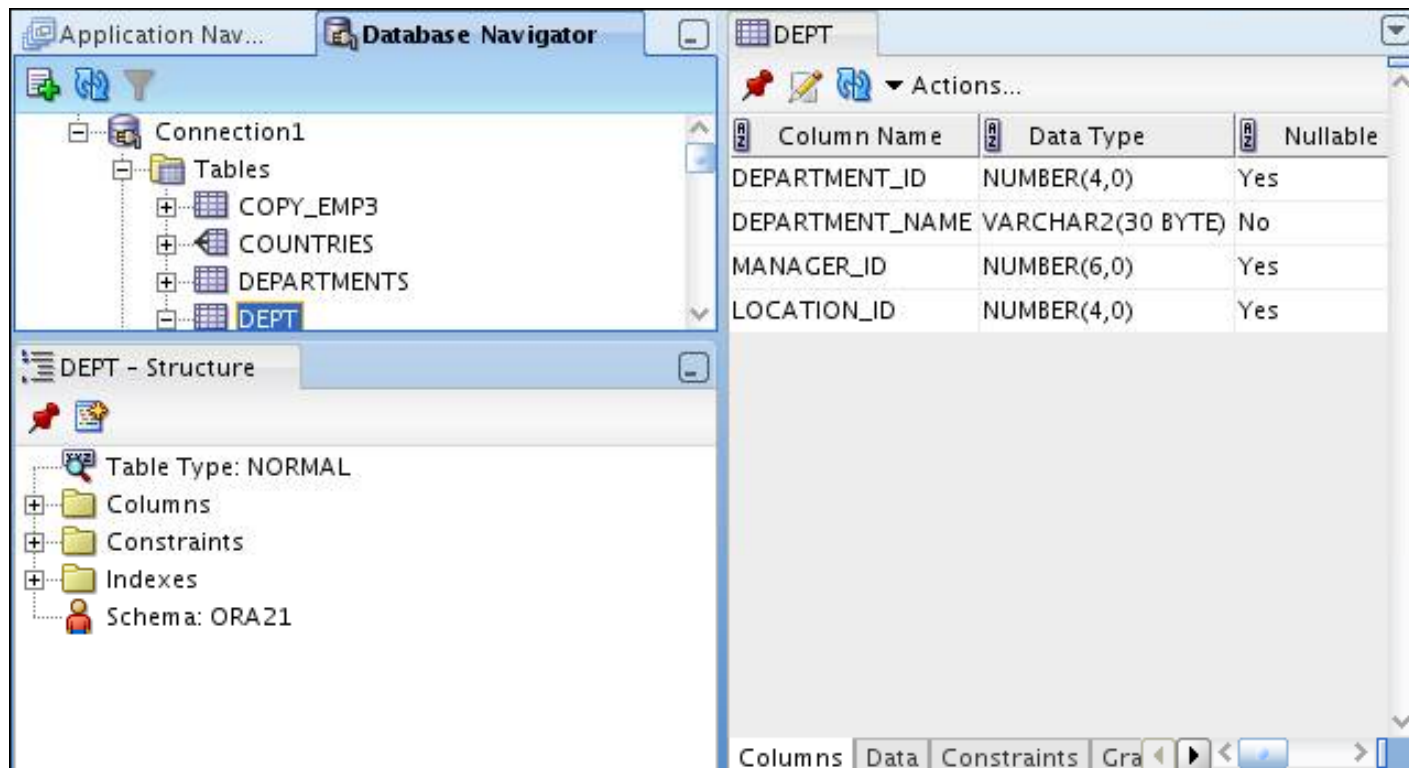

4

Click OK.

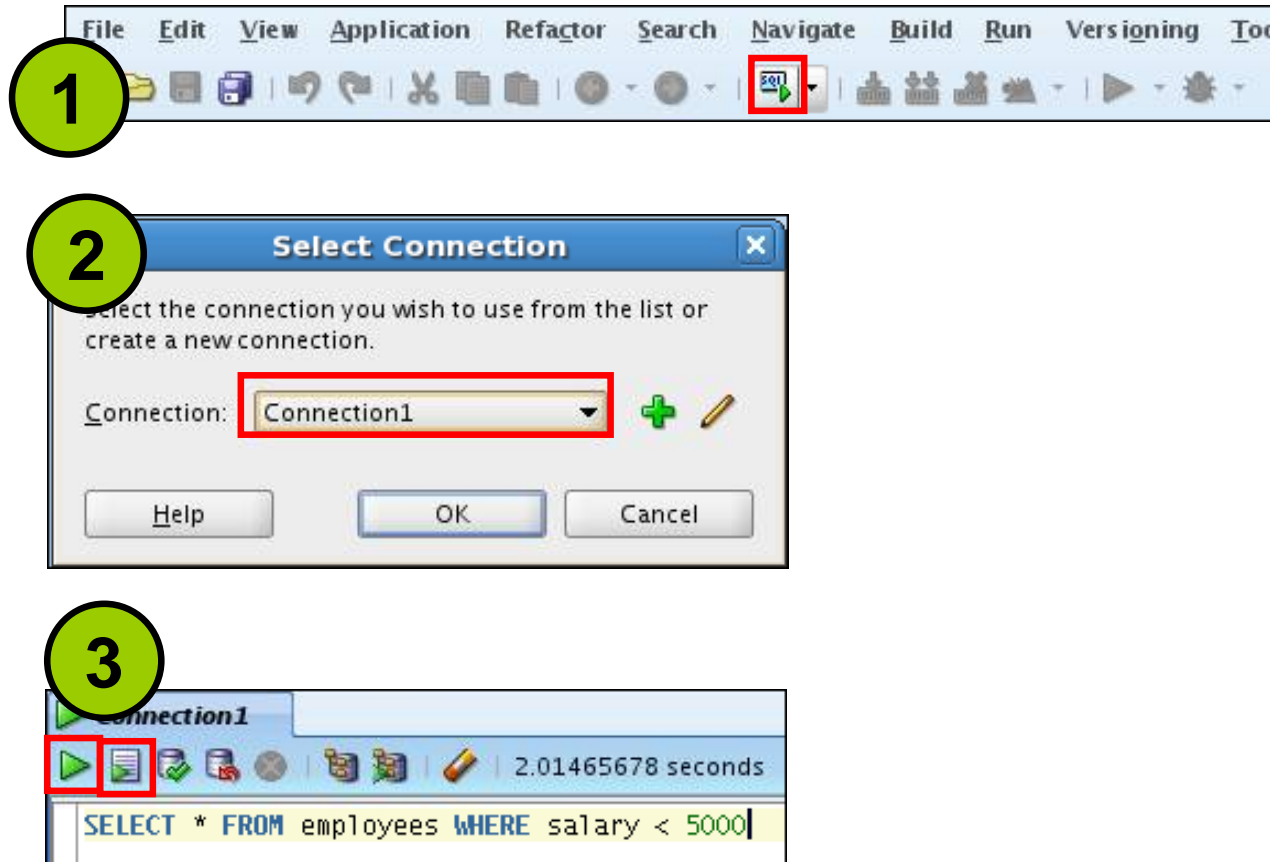

Browsing Database Objects

Use the Database Navigator to:

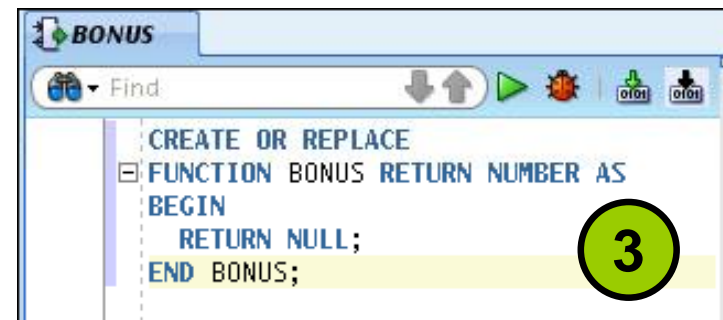

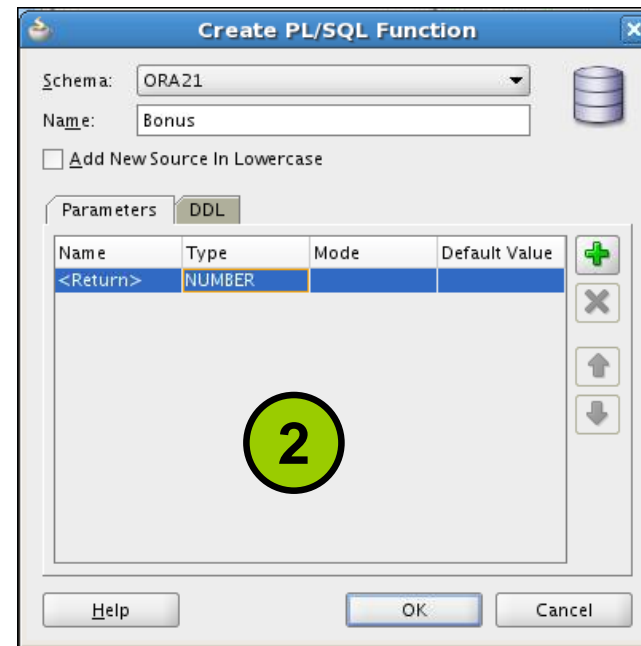

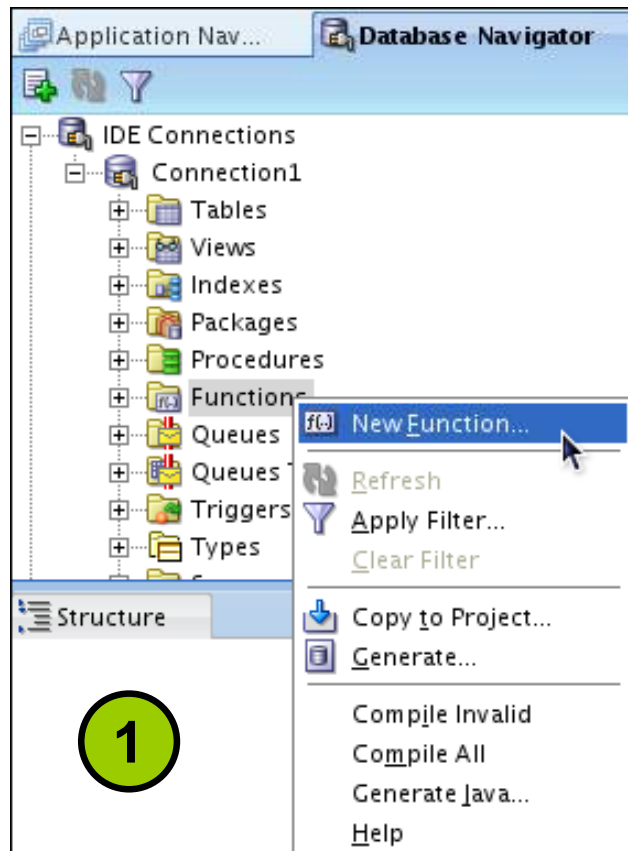

- Browse through many objects in a database schema
- Review the definitions of objects at a glance

Executing SQL Statements

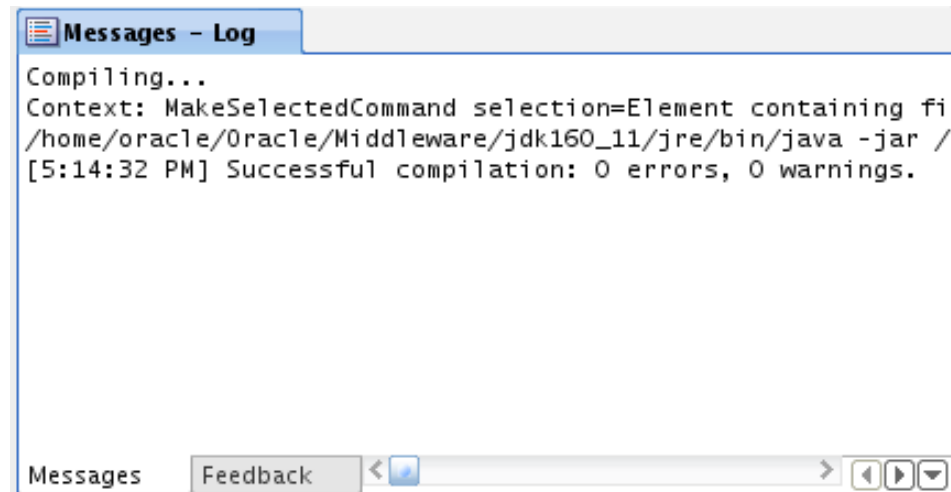

Creating Program Units

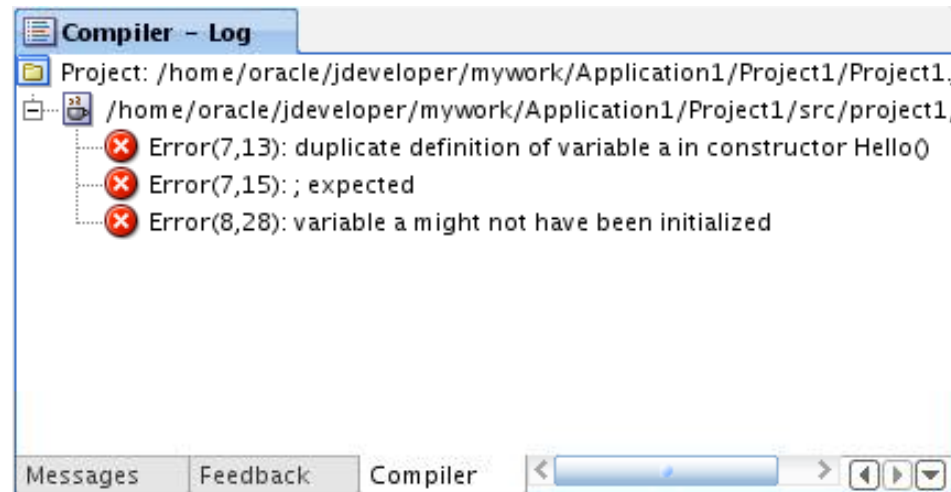

Skeleton of the function

Compiling

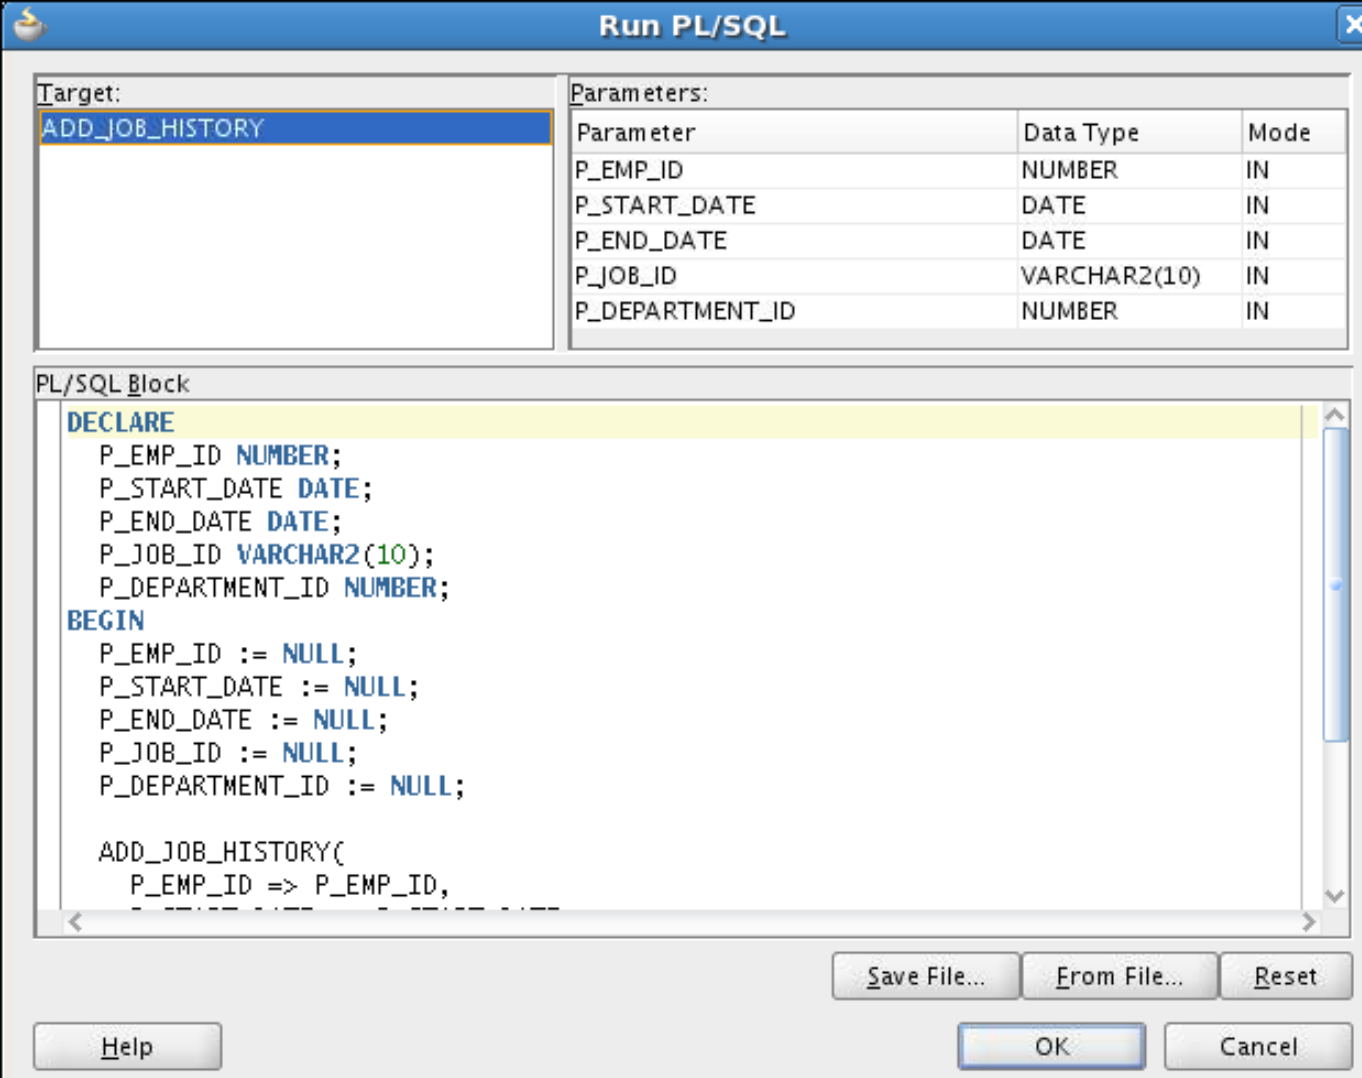

Compilation with errors

Compilation without errors

Running a Program Unit

Run PL/SQL

Target:

ADD_JOB_HISTORY

Parameters:

Parameter	Data Type	Mode
P_EMP_ID	NUMBER	IN
P_START_DATE	DATE	IN
P_END_DATE	DATE	IN
P_JOB_ID	VARCHAR2(10)	IN
P_DEPARTMENT_ID	NUMBER	IN

PL/SQL Block

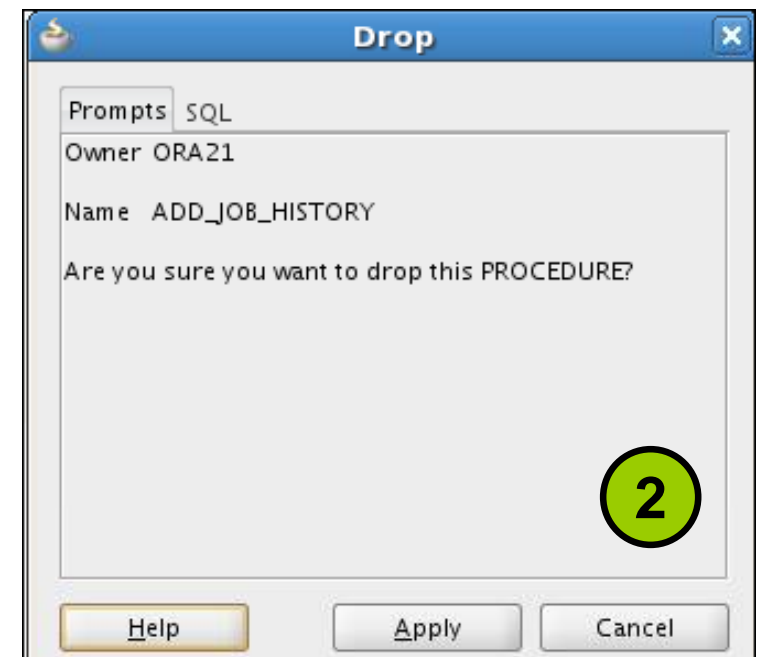

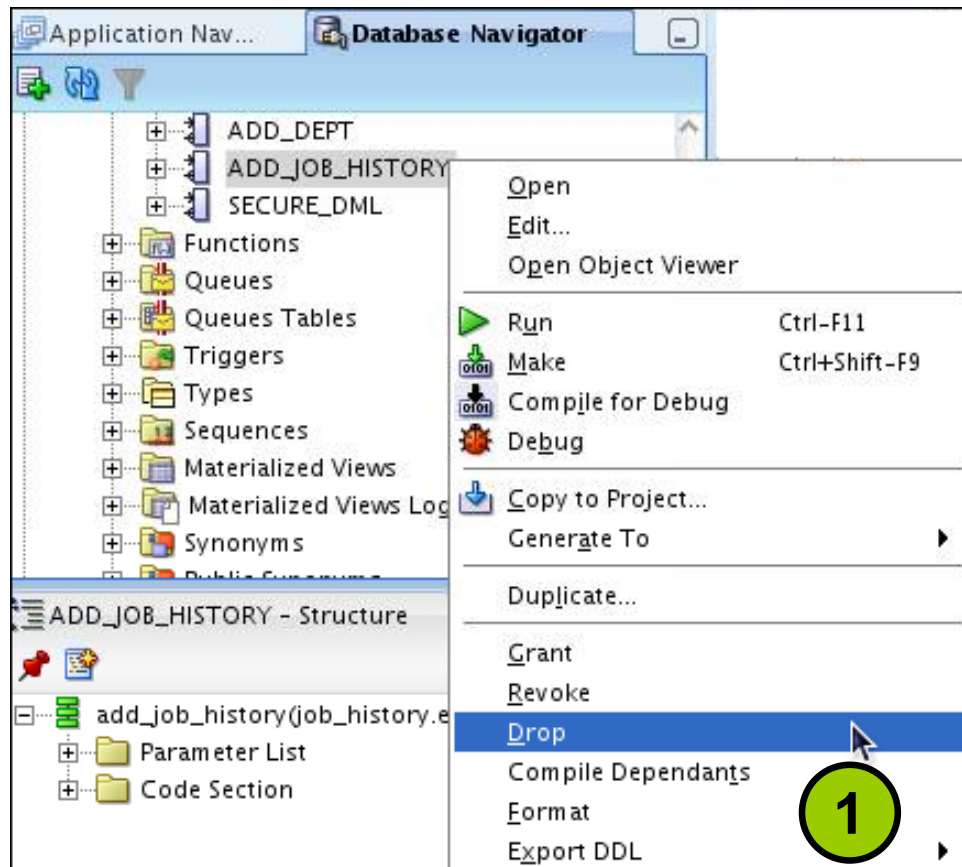

```
DECLARE
  P_EMP_ID NUMBER;
  P_START_DATE DATE;
  P_END_DATE DATE;
  P_JOB_ID VARCHAR2(10);
  P_DEPARTMENT_ID NUMBER;
BEGIN
  P_EMP_ID := NULL;
  P_START_DATE := NULL;
  P_END_DATE := NULL;
  P_JOB_ID := NULL;
  P_DEPARTMENT_ID := NULL;

  ADD_JOB_HISTORY(
    P_EMP_ID => P_EMP_ID,
```

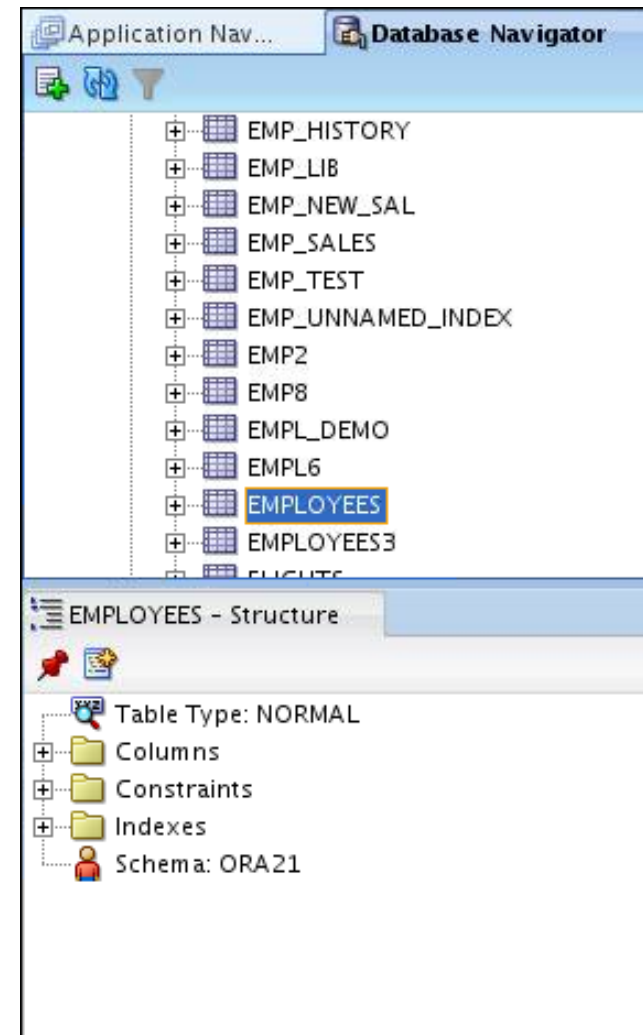

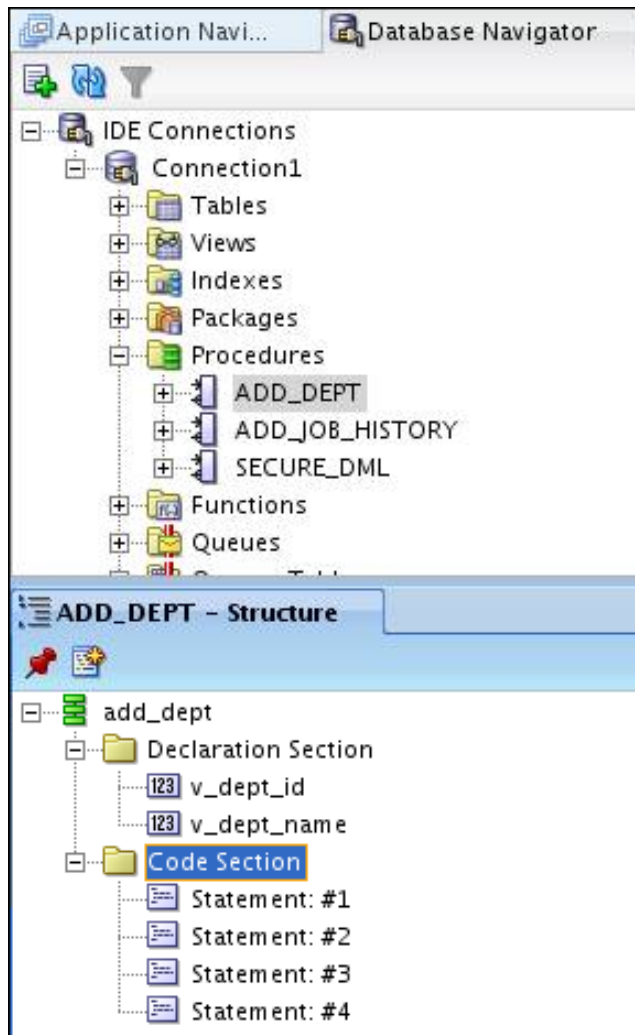

Save File... From File... Reset

Help OK Cancel

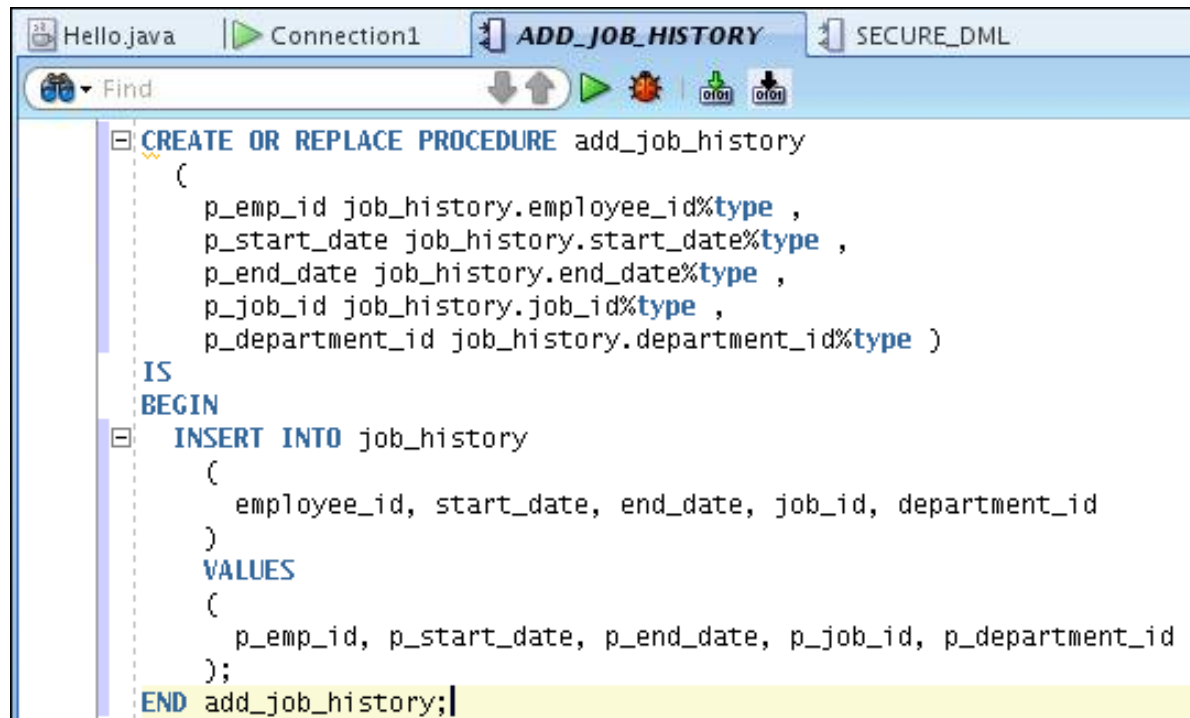

Dropping a Program Unit

Structure Window

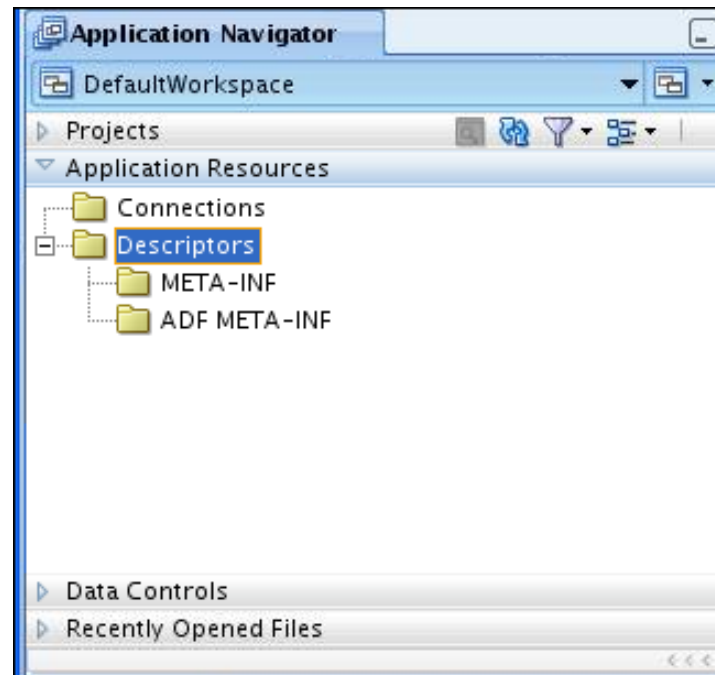

Editor Window

The screenshot shows the Oracle SQL Developer Editor Window. The title bar includes tabs for 'Hello.java', 'Connection1', 'ADD_JOB_HISTORY', and 'SECURE_DML'. Below the title bar is a toolbar with icons for Find, Run, and other functions. The main editor area displays the following PL/SQL code:

```
CREATE OR REPLACE PROCEDURE add_job_history
(
    p_emp_id job_history.employee_id%type ,
    p_start_date job_history.start_date%type ,
    p_end_date job_history.end_date%type ,
    p_job_id job_history.job_id%type ,
    p_department_id job_history.department_id%type )
IS
BEGIN
    INSERT INTO job_history
    (
        employee_id, start_date, end_date, job_id, department_id
    )
    VALUES
    (
        p_emp_id, p_start_date, p_end_date, p_job_id, p_department_id
    );
END add_job_history;
```

Application Navigator

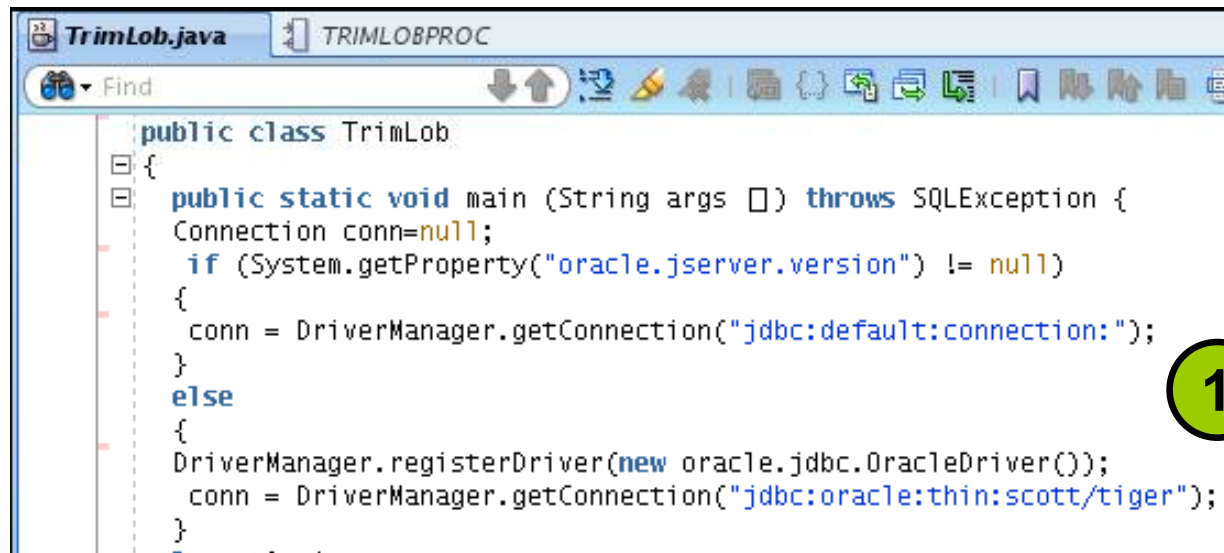

Deploying Java Stored Procedures

Before deploying Java stored procedures, perform the following steps:

1. Create a database connection.
2. Create a deployment profile.
3. Deploy the objects.

Publishing Java to PL/SQL

```
public class TrimLob
{
    public static void main (String args []) throws SQLException {
        Connection conn=null;
        if (System.getProperty("oracle.jserver.version") != null)
        {
            conn = DriverManager.getConnection("jdbc:default:connection:");
        }
        else
        {
            DriverManager.registerDriver(new oracle.jdbc.OracleDriver());
            conn = DriverManager.getConnection("jdbc:oracle:thin:scott/tiger");
        }
    }
}
```

```
CREATE OR REPLACE PROCEDURE TRIMLOBPROC
as language java
    name 'TrimLob.main(java.lang.String[])';
/
```

How Can I Learn More About JDeveloper 11g ?

Topic	Web site
Oracle JDeveloper Product Page	http://www.oracle.com/technology/products/jdev/index.html
Oracle JDeveloper 11g Tutorials	http://www.oracle.com/technology/obe/obe11jdev/11/index.html

Summary

In this appendix, you should have learned how to use JDeveloper to do the following:

- List the key features of Oracle JDeveloper
- Create a database connection in JDeveloper
- Manage database objects in JDeveloper
- Use JDeveloper to execute SQL Commands
- Create and run PL/SQL Program Units
